SETTLEMENT

THE PROBLEM

Cross-border payments are **broken**.

Per-country banking

Open accounts in every market. Manage dozens of banking relationships. Reconcile across all of them.

Payments in limbo

Funds disappear into corridors for days. Manual chasing. No verifiable proof of settlement.

Per-provider engineering

Every new country means a new provider, a new integration, and months of dev work.

BUILT FOR

Three audiences. One platform underneath.

01

Enterprises & Multinationals

Treasury without a branch in every market. Hold working balances, pay suppliers in local currency, repatriate revenue.

Treasury

Supplier payments

FX

Repatriation

02

Payroll & HR Platforms

Pay anyone, anywhere, in their local rails. Bank accounts, mobile money, cash — single API, single reconciliation file.

Worker payouts

Mobile money

Cash

03

Merchants & Marketplaces

Collect locally, settle globally. Accept local payments, settle into stablecoin or your home bank account.

Collections

Vendor payouts

Settlement

FX

First payment in under five minutes.

- On-ramp, off-ramp, payouts, collections & FX — single API
- Idempotency keys · webhook events · official SDKs
- Multi-chain settlement — Stellar, Ethereum, Solana
- Compliance Model A / B / C per corridor
- Sandbox with seeded corridors & live webhooks

```
// POST /v1/payouts
curl -X POST
api.zeam.money/v1/payouts \
  -H "Authorization: Bearer $KEY" \
  -d '{
    "connector": "ZA-OFF-001",
    "amount": "500.00",
    "currency": "ZAR",
    "funding": {"asset": "USDZ"}
  }'
{ "status": "delivered",
  "settled_at": "2026-04-18T10:14Z" }
```

Run operations from a single dashboard.

- 16 assets — USDZ, ZARZ, USDC, EURC + 12 more
- Bulk payouts to bank, mobile money, cash & wallet
- Collections with automatic reconciliation
- Stablecoin ↔ fiat — no hidden spread

LIVE BALANCES

USDZ

1,820,000

ZARZ

33,640,000

USDC

410,000

EURC

125,000

Multi-asset treasury.

No hidden spread.

A · SELF-SERVE

Dashboard + API

Hold 16 assets across named accounts. Convert at posted rates on Stellar DEX. Repatriate within minutes.

Fee
0.25 – 0.5%

ON-CHAIN
CONFIRMATION

Stablecoin Settlement

Funds settle on-chain
first, then deliver
locally. Verifiable tx ID.

99.99%+

STP TARGET

Deterministic Delivery

Every payment: delivered or
refunded. No limbo.

Compliant by design. Auditable by default.

- Compliance Model A / B / C per corridor
- On-chain auditability — verifiable tx ID
- Deterministic: **delivered** or **refunded**
- Idempotency on every write
